

Dr. Ron Mariotti's presentation to the Australian Osteopathic Association's annual convention (2013 in Perth, Australia)

Dr. Mariotti is an international teacher for the Barral Institute.

Within this segment of Dr. Mariotti's presentation to the Australian Osteopathic Association's annual convention (2013 in Perth, Australia) he discusses current research regarding neuroplasticity, visceral adhesions, and the relationship to the manual practice. <https://www.youtube.com/watch?v=lagxhKWQjyl>

Within this segment of Dr. Mariotti's presentation to the Australian Osteopathic Association's annual convention (2013 in Perth, Australia) he discusses research conducted by JP Barral and Gail Wetzler with visceral manipulation of the pelvic structures and low back pain. Dr. Mariotti also discusses success in his own practice with visceral manipulation of the pelvic organs and chronic low back pain. https://www.youtube.com/watch?v=DRZF_T8LyGk

Within this segment, Dr Mariotti shares research completed by Jean-Pierre Barral, DO, Gail Wetzler, PT and Daniel Amen, MD, regarding visceral manipulation and its effects on the brain as demonstrated by the use of SPECT scans. <https://www.youtube.com/watch?v=d6HbKRI5JRg>

Within this segment, Dr Mariotti gives a preview of soon to be released research by international lecturer for the Barral Institute A.J. De Koning, DO, & Dr Stefano Bianchi, Cardiologist, on the application of visceral manipulation with patients experiencing atrial fibrillation. https://www.youtube.com/watch?v=t_00ZizyYkl

Within this segment, Dr Mariotti explains the effects that adhesions can have on visceral mobility, with the support of a study done by Gil Hedley, showing images of fresh dissections from the study. <https://www.youtube.com/watch?v=52yVXa3qEZE>

Within this segment of Dr. Mariotti's presentation to the Australian Osteopathic Association's annual convention (2013 in Perth, Australia) he discusses the listening techniques as developed and taught by Jean Pierre Barral. <https://www.youtube.com/watch?v=manSuK411r4>

Case Study 1 - Within this segment of Dr. Mariotti's presentation to the Australian Osteopathic Association's annual convention (2013 in Perth, Australia) he discusses his successful treatment of a patient's chronic condition (chronic numerous bowel obstructions) with visceral manipulation. <https://www.youtube.com/watch?v=f2yXGU6etvE>

Case Study 2 - Within this segment of Dr. Mariotti's presentation to the Australian Osteopathic Association's annual convention (2013 in Perth, Australia) he discusses his successful treatment of a patient's chronic abdominal pain, back pain, and depression with visceral manipulation. <https://www.youtube.com/watch?v=XdgFoqz1nA0>
